Environmental Data

	Unit of Measurement	2024	2023	2022 ⁽³⁾	2021	2020
Total U.S. Energy Consumption ⁽¹⁾		36.9	37.4	45.4	41.3	40.4
U.S. Electricity Consumption (100% grid power)		26.5	27.4	32.5	30.6	29.6
U.S. Natural Gas Consumption (1 Therm= 2.93001e-5 GWh)	GWh	10.4	10.0	12.9	10.7	10.8
U.S. Renewable Energy Consumption ^{(2) (4)}						
Total Non-renewable Energy Consumption		19.3	20.6	22.6	22.7	23.3
Total Renewable Energy Consumption		7.5	8.8	10.3	8.2	6.7
Non-renewable Energy Rate (out of electricity consumption)	%	71.5%	69.6%	68.2%	73.2%	77.2%
Renewable Energy Rate (out of electricity consumption)	%	28.5%	30.4%	31.8%	26.8%	22.8%
Energy Intensity	GWh per Million Dollars Revenue	0.051	0.056	0.070	0.071	0.089
	GWh per Employee	0.03	0.031	0.037	0.038	0.041

- (1) All energy consumption considered comes from within the organization. Total energy consumption encompasses only U.S. consumption (91.4% of our owned and leased space). Historic energy consumption values have changed slightly from our 2021 disclosure due to accounting changes and the incorporation of all U.S. facilities.
- (2) Renewable energy usage has been calculated using supplier specific power mix data where available and EPA eGrid data. Renewable energy accounted for is consistent with Renewable Portfolio Standards (excludes large hydroelectric, nuclear, and some alternative fuels).
- (3) 2022 data has been updated in the 2024 Report, to correct a prior electricity usage understatement. In our initial release of the March 2023 Sustainability Report, we erroneously disclosed 12.6 GWh of U.S. Natural Gas Consumption, which has now been corrected to state 12.9 GWh. Other affected data points have been adjusted to reflect these two corrections.
- (4) We updated our renewable energy subtotals across all locations served by Constellation, an energy supplier, to correct prior overstatements ensuring accurate reporting. 2020-2023 data has been adjusted to reflect the revised percentages, following our providers' fuel mix reports.

Annex Notes

- All intensity values were calculated by dividing the identified environmental metric (total energy, emissions, water) by the identified denominator. Revenue and employee totals were retrieved from the corresponding annual report (10-K).

Unit of Measurement		2024	2023	2022 ⁽⁴⁾	2021	2020
Greenhouse Gas Emissions						
Scope 1 and 2 Emissions⁽¹⁾		9,660	9,320	10,472	10,452	10,681
Scope 1		1,860	1,803	2,339	1,949	1,956
Scope 2, market-based	Metric Tons of CO ₂ e ⁽²⁾	7,800	7,517	8,132	8,503	8,725
Scope 3^{(3) (5)}		4,968	4,479	1,112	524	526
Category 6: Business Travel		2,121	4,479	1,112	524	526
Category: Product Shipment Emissions		2,483				
Category: Employee Commuting		364				
GHG Intensity	Metric Tons CO ₂ e of Scope 1 & Scope 2 GHG Emissions per Million Dollars Revenue	13.5	14.0	16.0	17.9	23.5
	Metric Tons CO ₂ e of Scope 1 & Scope 2 GHG Emissions per Employee	7.85	7.7	8.5	9.6	10.8

- (1) Total greenhouse gas (GHG) emissions encompasses only U.S. emissions (91.4% of our owned and leased space). Scope 1 accounts for emissions from stationary natural gas combustion. Scope 2 accounts for emissions from purchased electricity.
- (2) We utilized the Greenhouse Gas Protocol's methodology for the calculation of scope 1 and 2 emissions. Additionally, we utilized the EPA Center for Corporate Climate Leadership GHG Emission Factors Hub, Green-e Residual Mix emissions rate tables, and supplier-specific emissions factors wherever possible to calculate our scope 1 emissions from stationary combustion and market-based scope 2 emissions. 2019 was selected as our base year, as it was the earliest year with verifiable energy and emissions data required for Scopes 1, 2, and 3 calculations. For 2024, we used a combination of 2024 energy source mixes wherever available, and 2023 mixes for those locations where 2024 data wasn't available.
- (3) Scope 3 calculations only include U.S. business travel via air and rail for 2020-2021, and U.S. business travel via air for 2022-2023 due to lack of availability of rail data for those years. Calculations were performed by a third-party global corporate travel manager and based on 2020 UK Government GHG Conversions.
- (4) 2022 data was updated in 2024 to account for electricity and gas usage understatements that appeared in our 2023 Sustainability Report. This understatement resulted in underreported emissions disclosure in our report, which is corrected above. For Scope 1 and Scope 2 emissions we disclosed 8,077 Metric Tons of CO₂e and 2,281 Metrics Tons of CO₂e respectively, that has been corrected to reflect 8,132 and 2,339.
- (5) Scope 3 emissions were assessed using all available data sources. Travel emissions were calculated for U.S.-based air travel; employee commuting emissions were derived from a 25% survey response, normalized to reflect a representative estimate of company-wide commuting impact. Supply chain and product shipment emissions were based on data from shipping providers, covering approximately 67% of 2024 shipments. Emissions avoided were determined using the EPA Equivalence Calculator, ensuring an accurate representation of avoided CO₂

- Our disclosure in 2021 marked Veeco's first public disclosure of GHG emissions. We assumed a conservative calculation methodology for our Scope 1 and 2 emissions inventory. For Scope 2 emissions in 2021, we utilized the EPA GHG Equivalencies Calculator based on the AVERT U.S. national weighted average CO₂ marginal emission rate for 2019.
- We worked to improve our market-based calculation, having incorporated supplier-specific emissions factors where available and Green-e residual mix data. This methodology change resulted in lower, but more accurate, emissions estimates for Veeco's U.S. operations. Additionally, it aligned us to a greater degree with the GHG Protocol methodology and best-practices for emissions calculations.

CDP Disclosure

- In 2021, we made our first public CDP disclosure of Scope 1, 2, and 3 emissions. In that CDP disclosure, our EHS Team inadvertently double-counted emissions for both Scope 1 and 2. Totals in this report are the correctly calculated values. In July 2022, we submitted our second CDP Climate Survey and corrected this mistake.

	Unit of Measurement	2024	2023	2022	2021	2020
Water						
Total U.S. Water Withdrawal ⁽¹⁾		36.065	31.7	52.9	44.8	45.6
Horsham, PA	Megaliters	3.87	3.4	2.7	2.6	3.9
Plainview, NY		2.76	0.8	2.5	2.2	7.3
Saint Paul, MN		2.1	2.1	1.4	2.0	2.8
San Jose, CA		24.03	22.8	41.9	34.4	27.7
Somerset, NJ		3.103	2.4	4.2	3.3	3.2
Waltham, MA ⁽⁷⁾		0.2	0.2	0.2	0.4	0.8
U.S. Water Withdrawal from Areas of High or Extremely High Water Stress		%	16.3%	10.1%	4.7%	4.9%
Freshwater Intensity	Megaliters of Freshwater Withdrawal per Million Dollars Revenue	0.05125	0.048	0.082	0.077	0.100
	Megaliters of Freshwater Withdrawal per Employee	0.0298	0.026	0.043	0.041	0.046
Waste ⁽³⁾⁽⁴⁾⁽⁶⁾						
Hazardous Waste	Metric Tons	14.1	18.8	16.1	17.4	26.7
Hazardous Waste Recycling Rate	%	49%	48%	56%	39%	32%
Non-hazardous Waste	Metric Tons	14.3	8.1	18.5	17.3	11.4
Non-hazardous Waste Recycling Rate	%	69%	56%	25%	46%	23%
E-Waste ⁽⁵⁾	Metric Tons	1.92	3.3	9.3	2.9	5.1
E-waste Recycling Rate	%	100%	65%	31%	35%	61%

Water Stress ⁽²⁾	
Horsham, PA	Medium-High (20-40%)
Plainview, NY	Extremely High (>80%)
Saint Paul, MN	Low (<10%)
San Jose, CA	Low-Medium (10-20%)
Somerset, NJ	High (40-80%)
Waltham, MA	Medium-High (20-40%)
Bangkok, TH	High (40-80%)
Hsinchu, TW	Low-Medium (10-20%)
Laguna, PH	Medium-High (20-40%)
Munich, DE	Low (<10%)
Penang, MY	Low (<10%)
Seoul, KR	Medium-High (20-40%)
Shanghai, CN	Extremely High (>80%)
Singapore, SG	Low (<10%)
Tokyo, JP	Medium-High (20-40%)

- (1) Veeco only withdraws fresh water. No disclosure of any other water type is applicable.
- (2) Water stress was identified by utilizing the WRI Aqueduct Water Risk Atlas. The tool's water stress function measures the ratio of total water withdrawals to available renewable surface and groundwater supplies.
- (3) Waste data is primarily collected and administered by our hazardous waste service providers. Select other specialty providers of e-waste and recycling services provide data as well. This data notably omits general office waste and singlestream recycling. We are working to fully account for our complete waste footprint.
- (4) Waste data, provided by our hazardous and non-hazardous waste collection providers, does not include municipal or general office/lab waste or single-stream recycling. Data scope does not cover all U.S. facilities or non-hazardous waste types.
- (5) E-waste includes batteries, monitors, circuit boards, and other general electronics collected and tracked by our hazardous and e-waste service providers.
- (6) Waste data for 2020-2021 corrects non-hazardous waste and E-waste items reported in previous years.
- (7) Our estimated usage is based on our leased space in the facility. Occupancy has remained constant between 2022 and 2024.

	2024	2023	2022	2021	2020
Employee Health and Safety ⁽¹⁾

Near Miss Frequency Rate (NMFR)	1.05	1.44	4.34	2.52	2.33
Work Related Fatality Rate	0	0	0	0	0
Product Safety					
Product recalls		0		0	0

(1) Includes all employees and non-employees covered under OSHA's injury and illness recordkeeping regulation. 29 CFR 1904.31(a) requires employers to record the recordable injuries and illnesses of employees they supervise on a day-to-day basis, even if these workers are not carried on the employer's payroll. Examples of non-employees whose injuries we track are contractors, consultants, and other hired workers. These metrics cover all Veeco global locations.

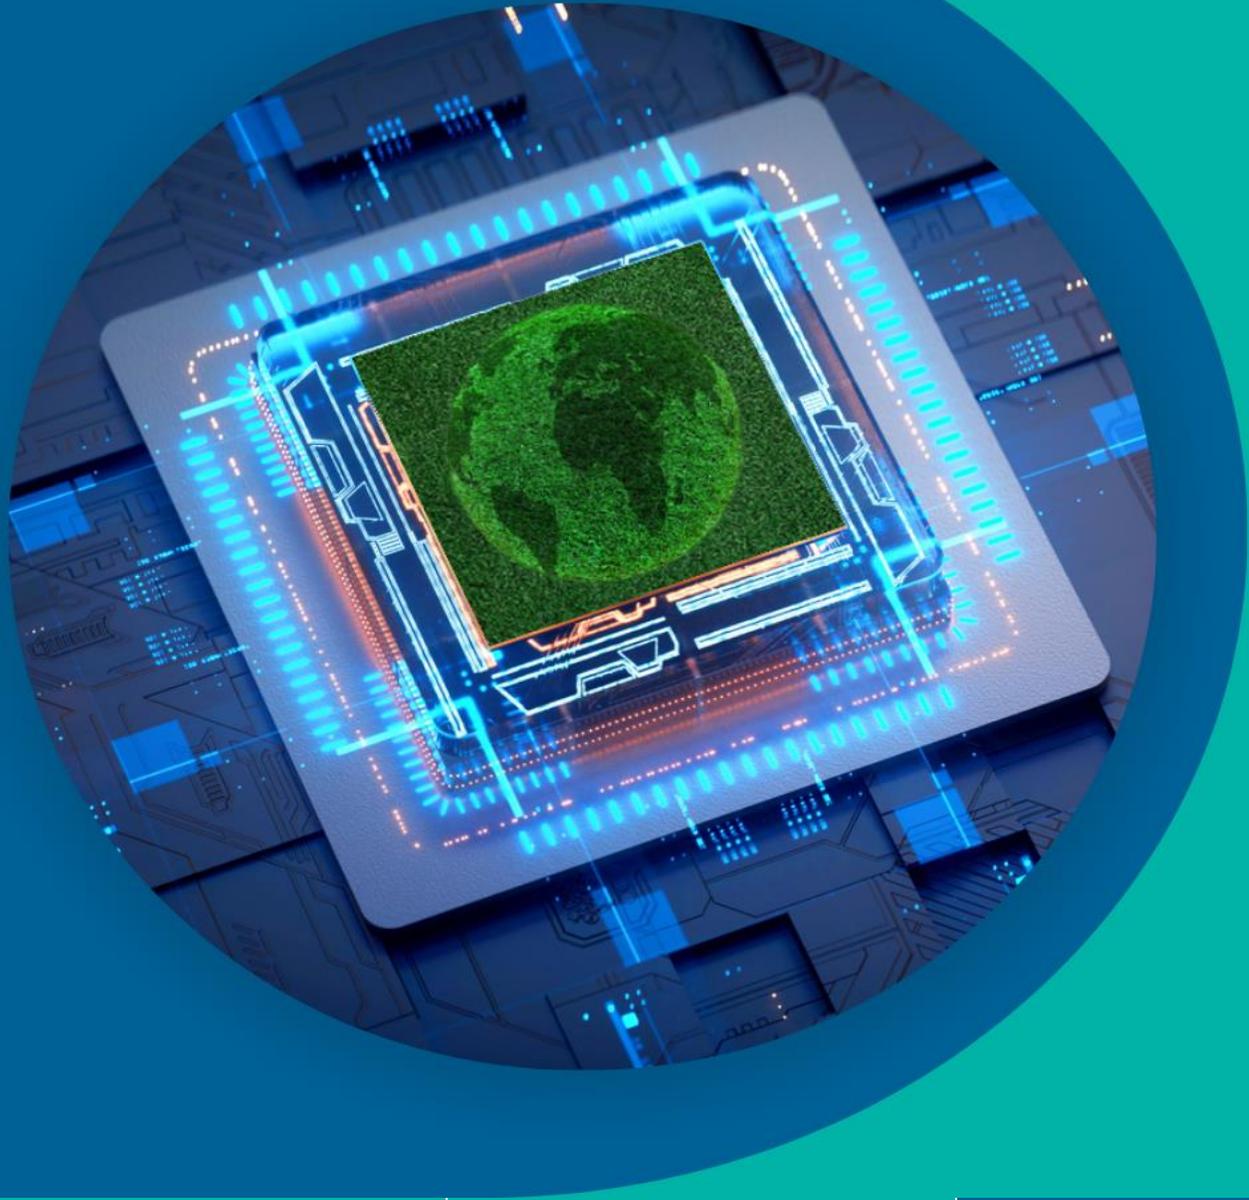

(2) Includes recordable incidents of medical and lost time incidents based upon OSHA recording criteria 1904.7.

(3) The TCIR, DART, LTSR, NMFR, and Fatality rates were calculated by multiplying their total incident count by 200,000 and dividing by the corresponding year's total workhours logged.

Topic	Code	Accounting Metric	2024	Narrative Response / Report Location
Greenhouse Gas Emissions	TC-SC-110a.1	Gross global Scope 1 emissions	1,860 MT CO ₂ e	Climate Change, pp. 54-56 Annex: Environmental Data
		Amount of total emissions from perfluorinated compounds	n/a	This data is not tracked at this time
	TC-SC-110a.2	Discussion of long-term and short-term strategy or plan to manage Scope 1 emissions, emissions reduction targets, and an analysis of performance against those targets		Climate Change, pp. 54-56 Annex: Environmental Data
Energy Management in Manufacturing	TC-SC-130a.1	Total energy consumed	132,840 GJ	Energy Management, p. 58 Annex: Environmental Data
		Percentage of energy consumed that was supplied from grid electricity	71.5%	
		Percentage renewable energy	28.5%	Our calculation methodology differs from SASB; we include the reported power mix of our energy suppliers and, where supplier data is unavailable, regional grids. We do not currently track the retirement of RECs or GOs from our utilities.
Water Management	TC-SC-140a.1	Total water withdrawn	36,740 m ³	Water Management, pp. 59-61 Annex: Environmental Data
		Percentage of water withdrawn in regions with high or extremely high baseline water stress	16.3%	
		Total water consumed	n/a	Aside from water lost to evaporation, irrigation, or recycled in closed loop systems, Veeco returns withdrawn water to local water treatment facilities. While we don't currently have a tracking mechanism in place, we expect that the vast majority of our withdrawn water is returned to its local facility for treatment.
		Percentage of water consumed in regions with high or extremely high baseline water stress	n/a	

Topic	Code	Accounting Metric	2024	Narrative Response / Report Location
Waste Management	TC-SC-150a.1	Amount of hazardous waste from manufacturing	14.1 MT	Waste Management, pp. 62-63 Annex: Environmental Data
		Percentage of hazardous waste recycled	49%	
Employee Health and Safety	TC-SC-320a.1	Description of efforts to assess, monitor, and reduce exposure of employees to human health hazards		Veeco United Team, pp. 16-18
	TC-SC-320a.2	Total amount of monetary losses as a result of legal proceedings associated with employee health and safety violations	\$0	In 2024, Veeco was not fined for any health and safety violations.
Recruiting and Managing a Global and Skilled Workforce	TC-SC-330a.1	Percentage of employees that are foreign nationals	n/a	Veeco does not disclose the percentage of employees who are foreign nationals or located offshore; however, we do disclose a breakdown of employees by geographic region. Annex: Social Data
		Percentage of employees that are located offshore	n/a	
Product Lifecycle Management	TC-SC-410a.1	Percentage of products by revenue that contain IEC 62474 declarable substances	n/a	Veeco does not disclose this information.
	TC-SC-410a.2	Processor energy efficiency at a system-level for: (1) servers, (2) desktops, and (3) laptops		Veeco does not manufacture servers, desktops, or laptops.
Materials Sourcing	TC-SC-440a.1	Description of the management of risks associated with the use of critical materials		2021 Conflict Minerals Report Conflict Minerals Policy Human Rights Policy:
Intellectual Property Protection and Competitive Behavior	TC-SC-520a.1	Total amount of monetary losses as a result of legal proceedings associated with anti-competitive behavior regulations	\$0	In 2024, Veeco was not fined for any anti-competitive violations.
Activity Metrics	TC-SC-000.A	Total production	151 units	Veeco's total production amounted to 151 systems.
	TC-SC-000.B	Percentage of production from owned facilities	97%

Anti-Corruption			
3-3	Management of material topics		<u>Veeco Code of Conduct</u> : Sensitive Payments <u>Supplier Code of Conduct</u> : Anti-Corruption
205-1	Operations assessed for risks related to corruption		<u>Veeco Code of Conduct</u> : Sensitive Payments <u>Supplier Code of Conduct</u> : Anti-Corruption
205-2	Communication and training about anti-corruption policies and procedures		<u>Veeco Code of Conduct</u> : Sensitive Payments <u>Supplier Code of Conduct</u> : Anti-Corruption The Audit Committee maintains initial Board-level responsibility for anti-corruption and anti-bribery matters. Known violations will be escalated by the Chair of the Audit Committee to the full Board, as appropriate.
205-3	Confirmed incidents of corruption and actions taken		During the reporting period there were no incidents of corruption, incidents of business relationship termination or non-renewal due to corruption, nor public legal cases regarding corruption brought against the organization or its employees.
Anti-competitive Behavior			
3-3	Management of material topics		<u>Veeco Code of Conduct</u> : Antitrust & Unfair Competition
206-1	Legal actions for anti-competitive behavior, anti-trust, and monopoly practices		During the reporting period, there were no legal actions pending or completed implicating Veeco regarding anti-competitive behavior or violations of anti-trust and monopoly legislation.
Tax			
3-3	Management of material topics	Annex: GRI Index: 207-1, 2, & 3	
207-1	Approach to tax		Veeco has a tax strategy, but it is not publicly available. Our tax strategy is reviewed quarterly by our CFO and annually by the Audit Committee of the Board of Directors. Veeco is committed to compliance with all relevant tax laws and regulations. Veeco pursues a tax strategy that is sustainable, transparent, and supports Veeco's business priorities.

Disclosure Number	Disclosure Title	2024 Report & Annex Location	Veeco External Reference and Narrative Response
207-2	Tax governance, control, and risk management		<p>The tax department is led by the senior tax director, reporting directly to the Chief Financial Officer. The CFO is responsible for updating the Audit Committee of the Board of Directors on a regular basis, with support from the tax department leadership.</p> <p>The tax department is a centralized organization. The department participates in mergers and acquisitions, internal restructuring projects, and other key business changes to ensure tax impacts are considered. The CFO, tax department leadership, and other finance leaders hold weekly meetings to discuss business changes. The tax department makes every effort to remain current with all relevant tax law changes.</p> <p>With respect to tax accounting, Veeco is in full compliance with SOX internal control guidelines and ensure effective internal controls are in place. The tax department works closely with Finance and operating units to ensure correct understanding of business facts and transactions and align with statutory auditors and tax advisors for correct tax treatments.</p> <p>Through our tax department, our tax obligations are properly, effectively, and correctly disclosed in the annual and quarterly reports. Our Code of Conduct encourages reporting of any potentially unethical behavior. Employees can contact their manager, HR, or the Legal department, or report anonymously through the Veeco Hotline.</p>
207-3	Stakeholder engagement and management of concerns related to tax		<p>Veeco is committed to open and transparent relationships with tax authorities. For all requests for information or audits, we provide the required documentation in a timely manner. The CFO, CEO, Investor Relations, Audit Committee, and Board of Directors provide stakeholder views and concerns to the tax department. We make an effort to address the concerns, provide solutions, and develop responses for CFO review. Approved responses are communicated to the relevant parties.</p>
207-4	Country-by-country reporting	About this report, p.2.
